

IJM CORPORATION BERHAD

Factsheet

CONSTRUCTION

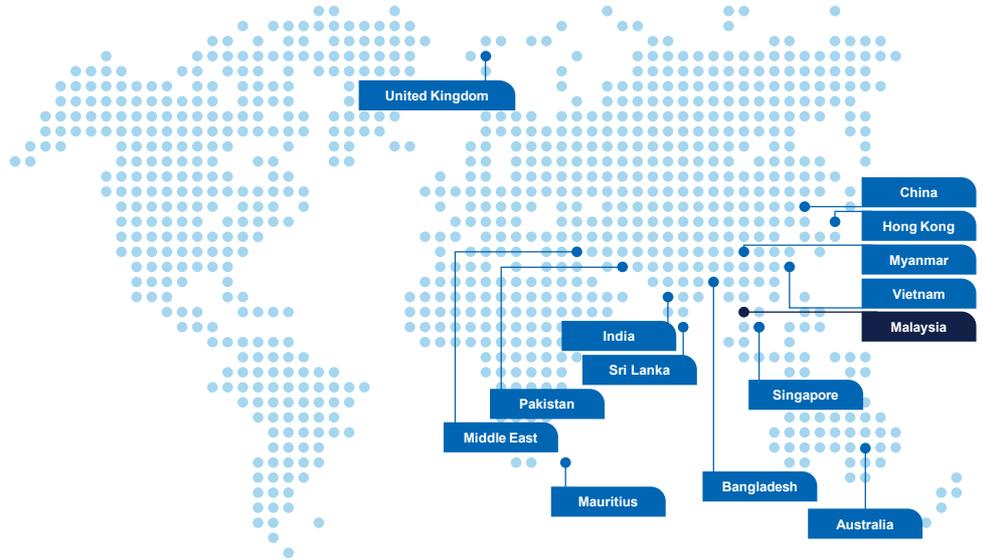

OVERVIEW

For over four decades, IJM Construction has delivered projects that shape skylines, connect communities and contribute to Malaysia's growth. Our portfolio spans highways, railways, metro systems, high-rise developments, shopping centres and hospitals, an increasing number of which are built to international green building standards.

With a strong record in complex projects, IJM excels in both greenfield and brownfield projects, contributing significantly to nation building and urban renewal. We expanded into higher-value sectors such as logistics infrastructure, E&E manufacturing facilities and data centres, while growing our presence in Singapore and the United Kingdom.

Our continued success reflects a commitment to excellence, quality and performance in every aspect of delivery.

IJM Construction projects around the world
